

## **VIRGINIA WINEWORKS CUSTOM WINEMAKING SERVICES**

With the changes in the Farm Winery statute, it has now become legal and less complicated to have wines made at an outside location. This is great news for growers with an interest in starting their own brand or a farm winery without having to invest in winery equipment or facilities. This is a great option for growers with extra tonnage or for growers who want to have a small (1 barrel minimum) production from their own grapes.

Virginia Wineworks can help get you started. We offer a full service operation from grapes through bottling under the guidance of winemakers Michael Shaps and Philip Stafford. We also offer warehousing as well as a potential retail outlet for your brand. Each client at Virginia Wineworks has the opportunity to be fully involved in the production of their wine, or through consultation, design the style and blends that suits their brand.

Pricing menu and winemaking options are available through Virginia Wineworks at: <mailto:info@virginiawineworks.com> or by calling 434-296-3438.
